----------------------------	----------

Households Receiving Food Stamps, Dec. 2017	1,477
Households Receiving TANF, Dec. 2017	58

Number Unemployed, Dec. 2016	781
Percent Unemployed, Dec. 2016	3.0

County Data Tables Sources and Definitions

Education

Source - Utah State Office of Education.

Enrollment - Enrollment numbers are for the Fall of each year and represent the number of students enrolled in Kindergarten through 12th grade. Does not include Charter Schools.

Pupil/Teacher Ratio - Pupil/Teacher ratios are based on the total number of students enrolled in Kindergarten through 12th grade and teachers include any person assigned to the school as a “regular classroom teacher”. This excludes Preschool teachers and special education teachers, guidance counselors, library specialist, etc. Does not include Charter schools.

Chronic Absence - Of students with at least 45 days in membership, the percentage that were absent for at least 10% of their days in membership. This is a new definition and makes the data in this year’s book not comparable to other year’s data.

Economics

Poverty - The federal poverty threshold for a two parent household with two children was \$22,050 in 2009. If a family makes less than this amount they are considered “in poverty”. Source - U.S. Census Small Area Income and Poverty Estimates (SAIPE).

Median household Income - Median income divides the income distribution into two equal groups, one having incomes above the median and the other having incomes below the median. It includes all income for the entire family. Source- SAIPE.

Unemployment - Seasonally adjusted unemployment rates. Source - Utah Department of Workforce Services (DWS).

TANF & Food Stamp Cases - The number of cases (households) receiving food-stamps or TANF at any time during the month indicated. A case is counted once even though there may be several individuals in the household. Source - Utah Department of Workforce Services.

Intergenerational Poverty - Intergenerational poverty is defined as poverty in which two or more successive generations of a family continue in the cycle of poverty and government dependence. Intergenerational poverty does not include situational poverty which is temporary and traceable to a specific incident or time period. Source: Utah Department of Workforce Service, IGP database.

Health

Source - Utah State Department of Health.

Prenatal Care - Number and percent of women receiving prenatal care in the first trimester as a percent of all live births for two, five year rolling averages.

Low Birth Weight Babies - Number of infants born weighing less than 2,500 grams (about 5.5 pounds) as a percentage of all live births for two, five year rolling averages.

Low Birth Weight Babies - Number of infants born weighing less than 2,500 grams (about 5.5 pounds) as a percentage of all live births

Infant Mortality - An infant death is defined as death of a live-born infant within one year of birth. Rates are per 1,000 live births for two, five year rolling averages.

Injury Deaths - Child injury deaths are those occurring to individuals ages 1 to 19 due to injuries (accidents, suicides, and homicides). Rates are per 100,000 youth and are for two, five year rolling averages.

Teen Births - Live births to married and unmarried females ages 15 to 17. Rates are per 1,000 females in that age range. Data is for two, four year rolling averages (different than the above indicators), this indicator presents data for 05-08 and 04-07. **Uninsured Children** - The number and percent of children ages 0-18 with no health coverage for a five year rolling average.

Child Abuse - The number is a distinct reported victim count. Victim counts across counties may be duplicated as a victim could have been serviced in more than one county. Source - Utah Department of Human Services, DCFS.

Uninsured Children - The number and percent of children ages 0-18 with no health coverage. Source - American Community Survey.

Health data is presented in rolling averages due to small incidence numbers in some of the counties, making the trend data more accurate and comparisons across counties more significant.
