

# Circles Salt Lake

Building Community to End Poverty

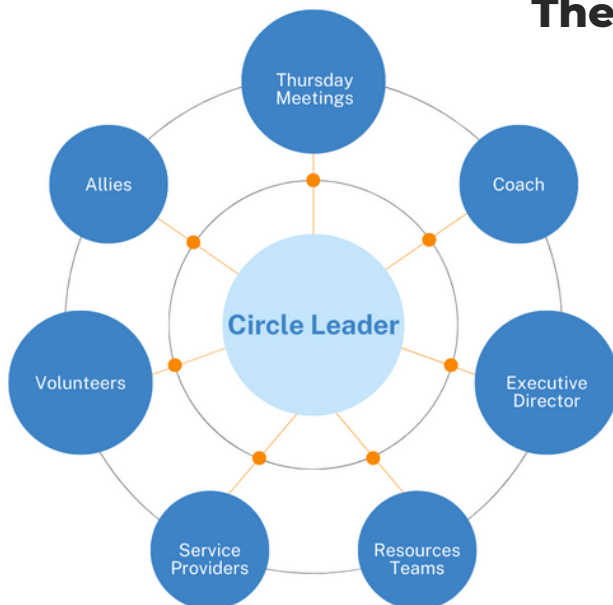

## Our Mission

Circles provides opportunities that inspire and equip families and communities to resolve poverty. Our vision is that everyone has enough money, meaning, and friends to thrive.

Circles is designed to not only support families in moving from poverty to economic stability, but to facilitate systemic changes in the community, which helps eliminate barriers to economic stability.

With the assistance of our dedicated volunteers and community members, we can provide resources to our families which include job opportunities, transportation, healthcare, and a variety of other services.

## The Model

### Circle Leaders

Individuals who are in generational poverty or situational poverty. They've tried their best and given it their all to improve the lives of themselves and their family.

### Allies

Volunteers who provide support to the Circle Leaders as they work through their goals.

### Resource Teams

Groups of diverse volunteers who contribute vital assistance, fresh ideas, and vision to the circles initiative.

### Volunteers

Individuals who attend our weekly meetings and help with set up and take down of the night. We also have volunteers who work exclusively with the children in Children's Programming.
