Talking KIDS Tour 2019

A Supplement to the 2019 Utah KIDS COUNT Data Book

December, 2019

For 25 years the Voices for Utah Children's KIDS COUNT Project has been producing our annual data book "*Measures of Child Well-Being in Utah*." The book provides state and county level indicators in 5 areas of child well-being and is the go-to resource on the well-being of children in Utah.

Measures of Child Well-Being in Utah stimulates dialogue on children's issues, and promotes accountability and action. Information is power. Equipped with facts, people can make a huge difference. That's why we took on the ambitious goal of visiting every county in Utah before the end of the year, seeking a dialogue between what the data says and what communities know about kids - particularly about the disparate life prospects for kids in diverse communities. We shared county information from our annual KIDS COUNT book and talked about the importance of the upcoming Census 2020. We chose the name "Talking Kids Tour," because our primary purpose was to listen and hear what was taking place in each community.

We appreciate the welcome we received across the state and look forward to continuing to spend time working with many new partners on issues that are important to the children of Utah.
