

Using Data to Make a Difference

Published: Wednesday, 05 October 2016 09:34

Written by: Questions?

In the work that we do, it is imperative that we use data to inform our decisions and help children and their families access the resources they need. But with so many different tools and resources, it can be hard to find trusted information. That's where the Data Center comes in. The Annie E. Casey Foundation's [KIDS COUNT Data Center](#) contains thousands of child well-being indicators related to education, poverty, health and youth risk factors. By being able to filter by state, city, county and congressional district, users are able to access data that is relevant in their communities. [Visit the Data Center today](#) to enact change.

Here are some examples of the data tools you can find at the Kids Count Data Center.

Using Data to Make a Difference

Visit the [Kids Count Data Center](#) to find data you can share and embed on your own website!

For 30 years now, Voices for Utah Children has called on our state, federal and local leaders to put children's needs first. But the work is not done. The children of 30 years ago now have children of their own. Too many of these children are growing up in poverty, without access to healthcare or quality educational opportunities.

How can you be involved?

[Make a tax-deductible donation](#) to Voices for Utah Children—or [or join our Network](#) with a monthly donation of \$20 or more. Network membership includes complimentary admission to Network events with food, socializing, and opportunity to meet child advocacy experts. And don't forget to [join our listserv](#) to stay informed!

We look forward to the future of Voices for Utah Children and we hope you will be a part of our next 30 years.
